

COMPLIANCE AND QUALITY DIVISION

Diamond Pharma Services offers GMP and GDP compliance services from clinical development to commercial distribution of the products' lifecycle.

CASE STUDY

MHRA inspection at overseas client's manufacturing site:

Diamond Compliance and Quality are pleased to announce the positive outcome of the first on-site GMP regulatory audit, by UK's Medicines and Healthcare products Regulatory Agency (MHRA), of an overseas client in Bangladesh in July 2017. A representative of Diamond Compliance and Quality undertook a pre-audit readiness gap analysis inspection and subsequently returned to the site during the MHRA audit. The MHRA inspection resulted in no Critical nor any Major observations being raised.

Prior to resumption of formal on-site audits in Bangladesh, by MHRA, Diamond Compliance and Quality had provided support to the same client by liaising with the VMD and MHRA Inspectorate's Risk, Control and Governance Unit for renew of the expiring VMD GMP certificate and granting of a MHRA GMP certificate following a desktop assessment.
